

Stargazing Diary

Name: _____

Month: _____

The Night Sky

Date: _____ Direction: _____

Label any of the objects that you already know. Tomorrow, look up the objects that you don't.

Describe the most interesting thing that you see in the sky.

The Night Sky

Date: _____

Direction: _____

Connect the stars to make constellations. If you know the actual constellation, use the correct outline, otherwise make up your own!

Write your own myth (story) about one of these constellations.

Trace Moon

Draw a detailed picture of the moon. What phase is it in? _____

Ask an adult why the moon seems to “follow” you wherever you go. Write your own myth (story) about why the moon does this.

Trace Moon

Draw a detailed picture of the moon everyday for at least a week.

How has the moon changed since you've been watching it?

Why does it change phases? Ask an adult if you are not sure.

The Night Sky

Notes:
